Summary

Self-motivated and result-oriented 3rd-year BCA student with a passion for programming and problem-solving. Quick learner and strong team player with hands-on experience in full-stack web development. Consistently delivers high-quality results in academic and practical projects.Enthusiastic about creating efficient, scalable, and user-friendly applications. Continuously exploring new technologies to stay updated with industry trends. Adept at balancing academic responsibilities with real-world development experience.

Experience

Intern — Zephyr Technologies and Solutions Pvt. Ltd., Mangalore (Jun 2024 - Jul 2024)

- Achieved 50% growth for a project using MongoDB, Express.js, React.js, and Node.js.
- Developed a restaurant management system with streamlined menu and order processing using the MERN stack.
- Built TST Ele Gadget, an 8-page e-commerce platform with secure login, product management, and admin dashboard.

Frontend Developer — MotionCut (Internship)

- Designed and developed multiple frontend components such as homepage, cart page, sliders, and carousel.
- Gained strong hands-on experience in responsive design and React component structure.

Coding Bootcamp Trainee — DLite

- Participated in intensive problem-solving sessions focused on C programming fundamentals.
- Solved various C problems on HackerRank and additional custom challenges to strengthen algorithmic thinking.

Education

Education	Year	CGPA/Percentage
DR NSAM First Grade College, NITTE KARKALA	2022- Present	9.03 CGPA
DR NSAM First Grade PU College, NITTE	2020-2022	92%
Gvt. High School Sanoor	2018-2020	85%

Projects

Restaurant Management System using MERN Stack

- Designed and developed a dynamic restaurant management application enabling efficient menu handling, order processing, and real-time updates.
- Technologies used: MongoDB, Express.js, React.js, Node.js.

TST Ele Gadget – E-commerce Platform

- Built a full-featured 8-page e-commerce website for electronic gadgets.
- Implemented secure login/authentication, product management features, and an admin dashboard using the MERN Stack.

Frontend Components – MotionCut Internship

- Designed and developed reusable frontend components including homepage, cart page, product slider, and image carousel.
- Gained practical knowledge of responsive layouts and modern UI principles using React.

C Programming Bootcamp – DLite

- Solved numerous algorithmic challenges and C programming problems through platforms like HackerRank.
- Strengthened core programming logic and critical thinking by engaging in competitive problem-solving.

Skills:

Programming Languages: Python, Java
Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), HTML, CSS, JavaScript
Database Management: MySQL, MongoDB
Soft Skills: Teamwork, Problem-Solving, Quick Learning

Languages:

English, Hindi, Kannada, Tulu.
